## Change Integrated Terminal title in vscode

Asked 2 years, 7 months ago   Active 3 months ago   Viewed 2k times

We can open command prompt in vscode by using the `Integrated Terminal` feature in `View` menu.

We can even open multiple terminals as shown below:

Is there any way I can change the title of the terminal ?

- **1: cmd.exe** will be **build terminal**
- **2: cmd.exe** will be **watch terminal**

I have gone through the [integrated terminal](#) documentation but I didn't find a way to do that.

Press in windows **Ctrl + Shift + P** and after type: Terminal: Rename, there you can **change the terminal name/title**

Sometimes, plugins will remove default keyboard shortcut bindings.

Look for "terminal.rename" in keyboard shortcuts then edit the keyboard shortcut to your preferred shortcut.

To apply your shortcut, make sure your cursor is focus in edit part of the window before you key in. Not at the terminal part.
