

It is possible to filter the symbols by type?

Asked 2 years ago Active 2 years ago Viewed 325 times

When I use `goToSymbol` command (php file for instance) it shows all symbols of the file (classes, methods, functions, variables, callbacks etc). In 99% of the cases I just want to see methods. How can I get a list of methods only?

I don't think it's possible to list *only* methods, but you can add a `:` to the filter textbox to group results by type:
