[VS Code How to Restore Menu Bar](#) 5 answers

How can I hide the menu bar in visual studio code? I do not find the command to do it. In some applications or browsers the **alt** key is used but I can not find the command or the option in the menu bar to hide it. Can you help me?

You can hide the menu bar by clicking the `Toggle Menu Bar` option in the `View` menu.

- 2 **For future readers:** Ctrl + Shift + P will open a command window and you can type `Toggle Menu Bar` to toggle it on and off. – [Pramesh Bajracharya](#) Jan 17 at 9:38

// Control the visibility of the menu bar. A setting of 'toggle' means that the menu bar is hidden and a single press of the Alt key will show it. By default, the menu bar will be visible, unless the window is full screen.

```
"window.menuBarVisibility": "toggle",
```

The default is "default", change it to "toggle" in your user settings..

2 File->Settings->"window.menuBarVisibility": "visible" – [peter70](#) Nov 9 '17 at 8:33

"window.menuBarVisibility": "hidden" works for does looking to disable it on Alt key press. – [Anthony Raimondo](#) Jun 19 '18 at 21:40

@Anthony, try the toggle setting above. – [Mark](#) Jun 19 '18 at 22:13

@Mark tried it in zen mode hitting Alt triggers the menu, but if set to hidden menu doesn't appear – [Anthony Raimondo](#) Jun 20 '18 at 11:36
