

# TSLint: Too many spaces before 'from' (import-spacing)

I'm using WebStorm and trying to keep such code style:

```
5 import { Component, OnInit } from '@angular/core';
import { ActivatedRoute, Params } from '@angular/router';
import { FormGroup, FormBuilder, Validators } from '@angular/forms';
import { AuthService } from '../core/auth.service';
```

But when I do that, TSLint underlines my spaces and gives me the hint:

"Too many spaces before 'from' (import-spacing)".

**My question is:** Is there a way to keep this code style without underlying? I also googled the problem, but with no success.

And I don't want to disable TSLint totally, just this rule for spaces.

typescript webstorm tslint

- 3 You can disable the TSLint rule, but have fun maintaining that. They will get out of alignment eventually, you're probably better off breaking on the braces like `import {\n Component \n} from 'foo' .` – [ssube](#) Aug 22 '17 at 22:53

@ssube, thanks for your answer! But how can i disable this rule? *"better off breaking on the braces..."*. I don't trying to break off something between braces, i'm trying to fix underlying spaces **after** braces – [Commercial Suicide](#) Aug 22 '17 at 23:56

It is a bad indenting style, plain and simple. Every time an import is added that is longer than what you already have, you need to update all import lines. Every time you remove an import from the longest import line, you also need to change all import lines. My suggestion: **adopt a coding style that requires modification and refactoring** – [ssube](#) Dec 24 '18 at 15:44

In your tslint.json file, add this rule:

7

```
{  
  "rules": {  
    "import-spacing": false  
  }  
}
```

See also: <https://palantir.github.io/tslint/rules/import-spacing/>

Facebook 

```
3  ... "tslint:recommended"
4  ],
5  "rules": {
6  ... "import-spacing": false
7  }
8  }
9
```

```
{ tslint.json x TS temp.ts x
1 {
2   "extends": [
3     "tslint:recommended"
4   ],
5   "rules": {
6     "import-spacing": true
7   }
8 }
9
```

```
1 import * as assert from "assert";
2
```
