keyboard shortcut for go back to last edited position in Visual Studio Code

6

In Visual Studio Code, is there a keyboard shortcut to navigate (move cursor) to the last edited position (like in all Jetbrains products with Ctrl+Shift+Backspace)?

The CTRL + - shourtcut moves to the last position (not the last edited position), which is less useful for me.
i am using with Visual Studio Code JetBrains IDE Keymap for Visual Studio Code:

Visual Studio Code Version 1.23.1 Commit d0182c3417d225529c6d5ad24b7572815d0de9ac Datum 2018-05-10T17:11:17.614Z Shell 1.7.12 Renderer 58.0.3029.110 Node 7.9.0 Architektur x64

I don't think there is a built-in way to move between edits, but I could be wrong. Otherwise, see edit history extension which also allows you to move between edits in other files if you wish as well as strictly within the current file.

[EDIT]: v1.28.0 just added a command to go back to the last edited position, see release notes: navigate back to last edited position.

> Navigate to last edit location
>
> A new command Go to Last Edit Location (workbench.action.navigateToLastEditLocation) was added to quickly navigate to the last location in a file that was edited. The default keybinding is

that's much better than that was i was looking for – SL5net Jun 1 '18 at 16:47

For Windows use `Alt+RightArrow` and `Alt+LeftArrow`.
