Possible duplicate of [Removing code structure view - breadcrumbs - in Visual Studio Code](#) – Mark Feb 14 at 11:42

2 Answers

It is breadcrumbs option. From `Preferences -> Settings` , type `breadcrumb` in text box until seeing the options below and uncheck the `Breadcrumbs` option to disable it.

This top bar is called "breadcrumbs". You can disable it in the visual user settings editor by unticking the checkbox or adding this line to your JSON config:

```
// settings.json
{
    "breadcrumbs.enabled": false,
}
```
